Color palettes

Hex colors for both themes. No images or icon libraries required.

LIGHT / crisp and quiet

Primary, semantic and neutral design tokens

Page	Surface	Text	Muted
#F7F8FC	#FFFFFF	#182235	#667085

Primary	Positive	Border	Soft accent
#4F46E5	#087F5B	#E4E8F0	#EEF2FF

DARK / soft contrast, not pure black

Primary, semantic and neutral design tokens

Page	Surface	Text	Muted
#0C1120	#151D2D	#F7F9FC	#AAB5C7

Primary	Positive	Border	Soft accent
#9DAAF9	#7BE5B1	#2B3548	#252E4A

Fonts, fields & buttons

Exact implementation sizes for developers - desktop first, responsive by default.

Font family Inter, system-ui, -apple-system, Segoe UI, sans-serif

TYPOGRAPHY / CSS PIXELS

Role	Font / size / weight	Usage
Hero	48 px / 760	Headline
Savings amount	43 px / 800	Positive result
Final price	57 px / 800	Primary outcome
Card title	22 px / 750	Form heading
Body	16 px / 400	Descriptions
Field label	13 px / 700	Above inputs
Input value	18 px / 650	Inside inputs
Placeholder	16 px / 400	Inside inputs
Button text	15 px / 750	Primary CTA

COMPONENT DIMENSIONS / CSS PIXELS

Primary button
54 h / 14 r

Secondary button
54 h / 14 r

Card container
590 max-w / 26 r

Field gap
17 desktop

Text input
58 h / 14 r

Input text padding

Card padding
38 desktop / 22 mobile

Focus ring
4 px / accent soft

At ≤640 px: one-column fields, 20 px page gutters, stacked result actions.

JavaScript workflow

A simple primary journey, with advanced controls tucked away.

01 **Read form**
readInputs()

↓

02 **Validate values**
validateInputs()

↓

03 **Calculate discount**
calculateDiscount()

↓

04 **Apply optional charges**
applyCouponTaxShipping()

↓

05 **Format currency**
formatCurrency()

↓

06 **Show savings + final price**
renderResult()

IF VALIDATION FAILS

showInlineError()

Keep the form visible. Focus the field.

SECONDARY ACTIONS

resetCalculator() · copyResult()

toggleTheme() · details accordion

Calculation should run only after validation. Format currency for display, not for math.

Ready for real users

Keep the advanced logic robust, even while the interface remains minimal.

CALCULATION ORDER

1. Percentage savings

original × (discountPercent / 100)

2. Coupon after discount

min(coupon, original − percentageSavings)

3. Tax after coupon

taxableSubtotal × taxPercent / 100

4. Final payable amount

original − percentageSavings − appliedCoupon + tax + shipping

SAMPLE OUTPUT / BASIC

Original ₹2,500 × 20% off

YOU SAVE ₹500 **PAY ₹2,000**

NON-NEGOTIABLE RELEASE CHECKS

- ✓ Discount limited to 0–100%; reject negatives and invalid numbers.
- ✓ Coupon cannot exceed post-discount subtotal; round to 2 decimals.
- ✓ Optional tax and shipping apply after discounts, not before.
- ✓ Phone layout has no horizontal scroll; keyboard and focus states work.
- ✓ Theme selection persists; no images, font files, APIs, or libraries required.
- ✓ 0% and 100% cases, copy failure, and form reset are handled.
